Dear Mr. Doak:

We have reviewed your May 26, 1994, letter regarding our Application for the Certificate of Designation (CD) for the New Sanitary Landfill (Landfill) at Rocky Flats. We request your expeditious review of the CD to assure that the comments identified in Colorado Department of Health's (CDH's) letter of August 28, 1992, have been resolved and that your letter of adequacy of the CD is forwarded to Jefferson County in a manner that accommodates our current Landfill program schedule.

Timely approval by Jefferson County to begin construction is crucial to the Landfill program schedule. Delays in the CD approval past the end of September 1994, will result in a day-to-day slip of the construction schedule. Any delay past mid-October would slip sequenced construction activities into the winter months, delay the test pad, and prevent excavation/fill until warmer weather returns, an approximate five month delay. This latter delay may impact our ability to accelerate the closure and remediation of Operable Unit 7 (OU 7), which is a compliance commitment negotiated with CDH as part of the Inter-Agency Agreement.

We have cooperated fully with CDH and Jefferson County throughout this CD process and will continue to do so. The successful completion of the New Sanitary Landfill project depends upon the timely approval of the CD to allow construction to proceed as scheduled. If you have any questions regarding this matter, please contact me at 966-3334 or Don Mittlestadt at 966-2084.

Sincerely,

Glenn M. Doyle
for Paul Cote, Acting Director
Waste Management Division

RE: Application for Certificate of Designation
New Rocky Flats Sanitary Landfill
Jefferson County

Dear Mr. Cote:

The Hazardous Materials and Waste Management Division of the Colorado Department of Health (the Division) has recently received the Environmental Assessment (EA) for the proposed New Sanitary Landfill at the Rocky Flats Plant. In addition to the EA, numerous other documents have been submitted, in part, from DOE's comments to the Division's August 28, 1992 letter and in part from DOE's final draft of the application for certificate of designation (the Application).

Subsequent to the Division's initial review of the Application, the Colorado Department of Health has amended the state's solid waste regulations 6 CCR 1007-2 (the Regulations) reflecting changes mandated by Subtitle D (40 CFR, Part 258). The Regulations became effective on October 9, 1993.

Mr. Poul Poulson, the original project officer, is no longer with the Division. Being the new project officer, I'll make every effort to become familiar with the Application in a timely manner. At the time of writing, the Division has the following tasks to complete on the Application:

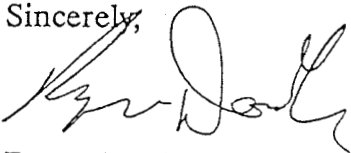

1. Review the Application for compliance with the state's revised solid waste regulations.
2. Determine the adequacy of the DOE's response to the Division's letter of August 28, 1992.
3. Review additional submitted documentation, which includes:
 - Rocky Flats Plant (RFP) Waste Treatment Sludge Analysis
 - 1992 RFP Background Geochemical Characterization Report
 - 1990 RFP Site Environmental Report (latest edition)

Mr. Paul Cote
May 26, 1994
Page 2

- RFP Groundwater Sampling Standard Operating Procedure (SOP)
- Engineering Design Information (March 28, 1994)
- Final Draft Submittal, Title II, nine (9) volumes (April 28, 1994)

The Division will continue the review of the Application and send its final decision to the Jefferson County Commissioners. If you have any questions regarding this matter, please contact me at 303-692-3437.

Sincerely,

Roger Doak
Geologist
Solid Waste Section
Hazardous Materials and Waste Management Division
